

NGC 4383

1 kpc

This is a deep-field astronomical image of the galaxy NGC 4383. The galaxy is an edge-on, barred spiral, with a bright, dense central region. The spiral arms are visible, showing a mix of blue and red colors, likely representing different stellar populations or ionized gas. The background is dark, filled with numerous small, distant stars. A scale bar in the bottom right corner indicates a length of 1 kpc. The image is framed by a white border with tick marks along all four edges.
